FOREWORD

Doctoral Research on Canada and Canadians, 1884-1983 is an important addition to the growing literature on Canadian theses. For some twenty years, the National Library, in collaboration with the Canadian university community, has contributed to the identification and availability of Canadian theses in several ways: by microfilming masters' and doctoral theses that are sent for reproduction by Canadian universities; by listing theses accepted at Canadian universities in the following serial publications: Canadiana (1953-), Canadian Theses, a printed bibliography covering the period from 1947 to 1979/80, and Canadian Theses (Microfiche), a biannual bibliography (cumulated every five years) that includes theses completed in Canada since 1980 and identifies foreign theses written by Canadians or of Canadian interest; and, by making copies of theses filmed by the National Library available for purchase and on-site consultation, and through interlibrary loan. Theses microfilmed by the National Library have been identified in this bibliography in the Index of Names and appear in the following format:

Smith, Gary John 10331
(MIC.F.TC-21973)

With the publication of this bibliography, the National Library reinforces, in a distinctive way, its commitment to provide support to members of the research community, particularly those engaged in Canadian Studies, and to acquire, preserve, and make accessible the national published heritage.

AVANT - PROPOS

Thèses de doctorat concernant le Canada et les Canadiens, 1884-1983 est un important complément à l'ensemble de la documentation portant sur les thèses canadiennes. Depuis environ vingt ans, la Bibliothèque nationale du Canada, en collaboration avec les universités canadiennes, a contribué à l'identification et à l'accessibilité des thèses canadiennes de plusieurs façons. Notamment, la Bibliothèque nationale a reproduit sur microfilm les thèses de maîtrise et de doctorat provenant des universités canadiennes; elle a répertorié des thèses acceptées par les universités canadiennes dans les publications en série suivantes: Canadiana (1953-), Thèses canadiennes, bibliographie sous forme imprimée comprenant les thèses parues de 1947 à 1979-1980, et Thèses canadiennes (Microfiche) bibliographie biennale, cumulative à tous les 5 ans, comportant les thèses écrites au Canada depuis 1980 et répertoriant les thèses étrangères rédigées par des Canadiens ou dignes d'intérêt pour le Canada. La Bibliothèque nationale a également filmé des thèses afin que les usagers puissent les acheter, les utiliser sur place ou les emprunter par le biais du prêt entre bibliothèques. Les thèses microfilmées par la Bibliothèque nationale ont été répertoriées dans cette bibliographie dans l'Index des noms de la façon suivante:

Fournier, Pierre 8753
(MIC.F.TC-31218)

Grâce à la publication de cette bibliographie, la Bibliothèque nationale consolide ses engagements et son appui aux chercheurs canadiens et tout particulièrement, à ceux qui sont impliqués dans les études canadiennes; ainsi, elle acquiert, conserve et rend accessible le patrimoine national publié.

PREFACE

This bibliography was compiled, copied, corrected, and recopied by the author over an eight-year period. The statistical accounting, numbering, and indexing was also done by the author and he assumes total responsibility for any errors or omissions. The bibliography includes dissertations accepted through to the spring of 1983 and every effort has been put forth to make it as complete and accurate as possible. Apologies are extended to those scholars whose dissertations may have been omitted inadvertently or classified improperly.

The author wishes to express his appreciation for the cooperation extended to him by the personnel responsible for the dissertation collections at the universities of Alberta, British Columbia, Carleton, Laval, McGill, Montreal, Ottawa, Simon Fraser, and Toronto, all of which he visited. He extends his special thanks also to the staff of the National Library of Canada, particularly to Gwynneth Evans for making this project possible and to members of the Publications Section: Wendy Neumann, English editor, Marie Duhamel, French editor, Gynette Lacasse, layout, and Linda L'Heureux and Roseanne Ducharme, word processors.

The author also expresses his gratitude to the Academic Relations Office of the Canadian Embassy in Washington, D.C., for the small grant that enabled this work to be completed.

PRÉFACE

Cette bibliographie a été préparée, transcrite, corrigée et retranscrite par l'auteur pendant plus de huit ans. La numérotation et la création de l'index ont également été effectuées par l'auteur qui assume l'entière responsabilité en ce qui a trait aux erreurs et aux omissions. Le nombre de thèses effectuées dans telle ou telle université est donné dans les introductions de chacune des sections. La bibliographie comprend les thèses acceptées jusqu'au printemps de 1983; tous les efforts possibles ont été mis dans ce projet afin de le rendre le plus complet et le plus exhaustif qui soit. L'auteur s'excuse auprès des personnes dont la thèse aurait été omise ou classifiée au mauvais endroit.

L'auteur souligne la grande coopération des employés responsables de la compilation des thèses aux universités de l'Alberta, de la Colombie-Britannique, de Montréal, d'Ottawa et de Toronto ainsi que les universités Carleton, Laval, McGill et Simon Fraser, endroits où il a effectué des recherches. L'auteur tient tout particulièrement à exprimer sa profonde reconnaissance aux employés de la Bibliothèque nationale, particulièrement à Gwynneth Evans qui a rendu ce projet possible et au personnel de la section des publications dont: Wendy Neumann, réviseur anglais, Marie Duhamel, réviseur français, Gynette Lacasse, responsable de la mise en page, Linda L'Heureux et Roseanne Ducharme, responsables du traitement de textes.

L'auteur désire également témoigner sa gratitude au Bureau des relations académiques de l'ambassade du Canada à Washington (D.C.), organisme qui lui a aidé dans l'élaboration de ses recherches.

INTRODUCTION

As a result of the advances achieved in Canadian graduate schools over the last 15 years, the output of doctoral research has grown tremendously. The total number of dissertations on a wide range of subject areas has reached a point where a classified bibliography is necessary to establish an inventory of doctoral dissertations on Canadian subjects. The present work attempts to fill that need.

It must be emphasized that the inventory in this particular study does not present a total picture of doctoral research completed in Canadian universities. It deals only with dissertations concerned with Canada and Canadians. What is not listed is the vast amount of doctoral research done in Canada and abroad which does not specifically relate to Canada.

The potential uses for this bibliography are endless. It provides information on the extent of graduate school research on Canada in three countries, Canada, the United States and Great Britain. Reference librarians and scholars researching Canada now have access to a central, permanent, bibliographical list. To further facilitate the sale, interlibrary loan and on-site use of doctoral dissertations, the National Library has incorporated in the Index of Names microfiche numbers of theses for which it holds copies on microform. These copies are available for sale from the Library's Canadian Theses on Microfiche Service. Scholars and specialists such as agronomists, economists, and policy-makers in governmental agencies will have access through this bibliography to data hitherto unknown to them. Professors may take advantage of the additional information to prepare lectures and, in their capacity as doctoral advisers, will find the list invaluable in discussing the selection of research topics with doctoral candidates. Unnecessary duplication will be avoided. The list will provide new leads, and point the way for future research by indicating the need for current surveys, encouraging the reexamination of controversial issues, and indicating gaps in our knowledge in various subject areas.

Two thirds of the total output listed in this bibliography was completed at Canadian universities, with most of the doctoral research approved in the last 15 years. One third was produced in American universities. Great Britain's contribution is considerably smaller, but numbers approximately 350 dissertations on Canadian subjects.

Doctoral research in Canada prior to 1970 was limited to a few older, well-established universities. The University of Toronto, the oldest doctorate-granting institution and chief contributor prior to 1970, emerges as the major producer, with almost 25 percent of the total number of doctorates approved in Canadian universities on Canadian subjects. The University of Toronto is also the leading contributor among Canadian universities in the areas of art, anthropology, communications, drama and theatre, economics, education, and geography, (it is a close second to McGill University in geology), geophysics,

INTRODUCTION

À la suite des progrès réalisés dans les établissements canadiens d'enseignement supérieur au cours des 15 dernières années, les résultats des recherches en vue du doctorat se sont multipliés de façon remarquable. Le nombre total des thèses dans une vaste gamme de sujets a augmenté à un tel point qu'une bibliographie classée est nécessaire pour avoir un inventaire des thèses traitant du Canada. Cet ouvrage tente de répondre à ce besoin.

Il faut insister sur le fait que l'inventaire établi dans cette étude n'offre pas une image complète des thèses de doctorat effectuées dans les universités canadiennes. Cet ouvrage n'énumère que les thèses concernant le Canada et les Canadiens. Seules les thèses de doctorat acceptées au Canada ou à l'étranger qui ne se rapportent pas directement au Canada ne sont pas répertoriées dans cet ouvrage.

Une telle bibliographie peut servir à de multiples usages. Elle fournit des renseignements sur l'ampleur des recherches effectuées sur le Canada dans les établissements d'enseignement supérieur de trois pays: le Canada, les États-Unis et la Grande-Bretagne. Les bibliothécaires de référence et les chercheurs qui font des travaux sur le Canada ont désormais accès à une liste bibliographique centrale, permanente et exhaustive. Afin de faciliter la vente, le prêt entre bibliothèques et l'utilisation sur place des thèses de doctorat, la Bibliothèque nationale a incorporé, dans l'Index des noms, les numéros des thèses sur microfiche quand elle en possède des exemplaires sur microforme. Les usagers peuvent acheter des exemplaires de ces thèses au Service des thèses sur microfiche. Des chercheurs et des spécialistes tels que des agronomes, des économistes et des responsables de l'établissement des politiques dans des agences gouvernementales auront accès, par cette bibliographie, à des données qui, jusque-là, leur étaient inconnues. Des professeurs peuvent recourir à des renseignements supplémentaires pour préparer leurs conférences et, en tant que directeurs de thèses, apprécieront l'utilité de la liste lorsqu'ils auront à discuter du choix des thèmes de recherches avec les candidats au doctorat. Il sera alors possible d'éviter de faire deux fois un même travail. La liste fournira de nouveaux fils conducteurs et ouvrira la voie à d'autres recherches en signalant les besoins des études actuelles; elle favorisera l'étude des questions génératrices de controverses et indiquera les lacunes que présentent nos connaissances dans différents sujets.

Les deux tiers de l'ensemble des ouvrages énumérés dans cette bibliographie ont été rédigés dans les universités canadiennes et la plus grande partie de ces thèses ont été approuvées dans les 15 dernières années. Un tiers des thèses a été produit dans les universités américaines. La contribution de la Grande-Bretagne est plus petite avec environ 350 thèses ayant trait au Canada.

Avant 1970, au Canada, la recherche en vue du doctorat était limitée à quelques universités anciennes bien paleontology, health sciences, language, library studies, politics, psychology (with York University a close second), religion and sociology. It is also a major contributor in science studies. Toronto's doctoral output is more than twice that of the University of Alberta, the second-largest producer of dissertations on Canadian subjects. Alberta's major output is in education (second to Toronto), engineering, sports, and physical education. The universities of McGill and British Columbia follow with approximately equal output. McGill is first in geological studies, climate and meteorology, and third in scientific studies. The University of British Columbia is first in scientific studies mainly due to its large output in botany and forestry. The universities of Montreal and Ottawa are a close fifth and sixth in terms of doctoral output. Montreal along with Laval University is strong in law. Montreal is also a force in music and psychology but ranks third in literature. The University of Ottawa is second in literature, (Laval is number one) and religion while the University of Western Ontario, Laval, and Queen's follow in that order. The University of Manitoba is first in agriculture, the University of Waterloo is first in urban and regional planning, and the University of Calgary ranks first in doctoral output in the field of archaeology.

Although the primary purpose of this project is to list the dissertations with a brief statistical analysis of each classification, a secondary purpose is to encourage research in those areas in which little doctoral work has been done. No attempt has been made to present judgments on the overall picture of doctoral work in Canada.

Over the last decade the number of women engaged in doctoral research has increased dramatically. This trend is reflected in doctoral research on Canada, primarily in the fields of education, psychology, literature and languages, anthropology, and sociology. However, there does not seem to have been a large increase in the number of women pursuing doctoral research in scientific studies.

A statistical review of American dissertations shows that almost every graduate school in the United States has produced at least one dissertation dealing with Canada and Canadians. Of the 184 American universities listed, 14 have produced over 100 dissertations on Canada, with Harvard University at the top of the list. Columbia University is a close second, followed by the universities of Michigan, Wisconsin, Chicago, Washington (Seattle), Princeton, Cornell, Yale, Minnesota, Illinois, California (Berkeley), Ohio State, and Michigan State. The subject areas in which most research was completed are geology, economics, education, scientific studies.

Twenty-nine universities in the United Kingdom produced 339 doctoral dissertations on Canada and Canadians over a 70-year period, with the first thesis being accepted in 1914, in the field of economics, at the University of London. During the 1920's, eight dissertations were completed, four at the University of Edinburgh. Three times as many studies were

connues. L'Université de Toronto, le plus ancien établissement à avoir accordé des doctorats et le plus grand producteur de thèses avant 1970, a fourni le plus grand nombre de thèses avec presque 25 pour cent du nombre total des thèses de doctorat approuvées par les universités canadiennes. L'Université de Toronto vient en tête de l'ensemble des universités canadiennes dans les domaines de l'art, de l'anthropologie, des communications, de l'art dramatique et du théâtre, de l'économie, de l'éducation et de la géographie; elle suit McGill en géologie, en géophysique, en paléontologie, en sciences de la santé, en langues, en bibliothéconomie, en politique, en psychologie (où York la suit de très près), en religion et en sociologie; enfin, Toronto fournit une importante contribution en études scientifiques. La production de thèses de Toronto peut se comparer avec celle de l'Université de l'Alberta, qui est le second plus grand producteur de thèses portant sur des sujets canadiens. Les points forts de l'Alberta portent sur l'éducation (seconde université après Toronto), l'ingénierie, les sports et l'éducation physique. Les universités McGill et de la Colombie-Britannique suivent avec des résultats à peu près égaux. McGill est la première université pour les études de géologie, sur le climat et la météorologie, et la troisième pour les études scientifiques. La Colombie-Britannique est la première pour les études scientifiques en raison de sa vaste contribution en botanique et en foresterie. Montréal et Ottawa sont très près l'une de l'autre, aux cinquième et sixième rangs. Montréal se distingue dans le domaine du droit, comme Laval; elle se tient au troisième rang en littérature, et occupe une solide position en musique et en psychologie. Ottawa est deuxième en littérature (Laval est la première) et religion. Les universités Western Ontario, Laval et Queen's suivent, dans l'ordre, puis viennent les universités du Manitoba (première en agriculture), de Waterloo (première en planification urbaine et régionale) et de Calgary (première en archéologie).

Bien que le principal but de ce projet soit d'établir une liste de ces thèses avec une brève analyse statistique de chaque classification, il en existe un second qui est d'encourager la recherche dans les domaines où peu de thèses de doctorat ont été faites jusqu'ici. Aucune tentative n'avait encore été faite, pour permettre d'examiner une image d'ensemble des thèses de doctorat au Canada.

Depuis une dizaine d'années, le nombre de femmes qui font de la recherche en vue d'un doctorat s'est accru de façon marquée. Cette tendance s'est reflétée dans la recherche sur le Canada, surtout en matière d'éducation, de psychologie, de littérature et de langues, d'anthropologie et de sociologie. Il ne semble pas que les femmes aient fait une brèche spectaculaire dans les études scientifiques.

Un examen statistique des thèses américaines montre que presque tous les établissements d'enseignement supérieur aux États-Unis ont produit au moins une thèse portant sur le Canada et les Canadiens. Des 184 universités américaines énumérées, 14 ont produit cent thèses ou plus sur le Canada; Harvard est en tête

approved in the 1930's, with one third of that number coming from the University of London. Although the 1940's saw a drop to 15 studies, due to World War II, the number more than doubled in the 1950's to 33 dissertations (29 from London and Oxford). During the 1960's the number doubled again to a total of 78 titles.

The 1970's witnessed a very large increase to a total of 148 titles, and the 1980's thus far, have produced 32 theses. For the first half of the century, research on Canada was mostly carried out by the universities of London, Edinburgh, Oxford, and Cambridge. In the 1960's while several more universities approved dissertations on Canadian topics, the same four universities were dominant. In the 1970's however, as many as 25 universities produced dissertations on Canada. Reviewing the statistics, we find that the University of London has a commanding lead, with a total of 135 doctoral dissertations; Oxford University produced 69 titles, Cambridge University 40 titles, and the University of Edinburgh 23 titles. No attempt has been made to determine how many of the British dissertations were completed by Canadians studying for doctorates abroad.

The following is a review of subject areas studied by students of British universities, in order of output: history (74 titles), politics (46), geology (38), law (29), geography (26), immigration (17), literature (16), education (13), anthropology (13), health sciences (12), religion (10), science studies (9), paleontology (8) agriculture (9), language (3), urban and regional planning (2), architecture (1), publishing (1), library studies (1), climate (1), and no studies in the Canadian arts, communications, archaeology, geophysics, engineering, sports, and psychology. The University of London dominates all of the categories with the exception of religion, geology and scientific studies.

The book contains a small number of dissertations in English from European Schools, the universities of Dublin and Cork in Ireland, and New South Wales in Australia, which the compiler found during the course of his research. These have been included so that they may be helpful to future researchers.

de liste, Columbia la suit de près, puis se classent les universités du Michigan, de Wisconsin, de Chicago, de Washington (Seattle), de Princeton, Cornell, Yale, du Minnesota, de l'Illinois, de Californie (Berkeley), d'Ohio State et de Michigan State. La plupart des thèses portaient sur la géologie, l'économie, l'éducation et les études scientifiques.

Vingt-neuf universités du Royaume-Uni ont produit 339 thèses de doctorat sur le Canada et les Canadiens tout au long d'une période de 70 ans, la première thèse ayant été acceptée en 1914 en économie, à l'Université de Londres. Dans les années 1920, huit thèses ont paru, dont quatre à Édimbourg. Trois fois autant d'études ont été approuvées dans les années 1930, avec un tiers provenant de l'Université de Londres. La Deuxième Guerre mondiale, dans les années 1940, a amené une baisse du nombre des thèses de doctorat, qui est tombé à 15, chiffre qui a plus que doublé dans les années 1950 avec un total de 33 thèses (dont 29 pour Londres et Oxford seulement). Dans les années 1960, les chiffres ont encore plus que doublé pour atteindre 78 thèses.

Les années 1970 ont vu monter à 148 titres le total des thèses, et les années 1980, jusqu'à maintenant, en ont produit 32. Pendant la première moitié du siècle, ce sont les universités de Londres, Édimbourg, Oxford et Cambridge qui se sont intéressées aux recherches sur le Canada. Dans les années 1960, tandis qu'un plus grand nombre d'universités approuvaient des thèses sur des sujets canadiens, les mêmes quatre universités ont continué de se maintenir au premier rang. Dans les années 1970, cependant, il y eut jusqu'à 25 universités qui produisirent des thèses sur le Canada. Selon les statistiques, l'Université de Londres vient en tête avec un total de 135 thèses, celle d'Oxford vient ensuite avec 69, Cambridge s'inscrit en troisième place avec 40 titres, et Édimbourg suit avec 23. On n'a pas cherché à déterminer combien de thèses britanniques ont été présentées par des Canadiens poursuivant des études de doctorat à l'étranger.

Voici une liste détaillée des sujets de thèses choisis par les étudiants des universités britanniques: histoire (74 titres), politique (46), géologie (38), droit (29), géographie (26), immigration (17), littérature (16), éducation (13), anthropologie (13), sciences de la santé (12), religion (10), études scientifiques (9), paléontologie (8), agriculture (9), langues (3), planification urbaine et régionale (2), architecture (1), édition (1), bibliothéconomie (1), climat (1); il n'y a pas eu d'études sur l'art canadien, non plus que sur les communications, l'archéologie, la géophysique, l'ingénierie, les sports et la psychologie au Canada. L'Université de Londres compte le plus grand nombre de thèses dans toutes les catégories, à l'exception de la religion, de la géologie et des études scientifiques.

Le livre contient un petit nombre de thèses en anglais produites par des universités européennes, Dublin et Cork en Irlande, et New South Wales en Australie; le compilateur les a découvertes au cours de ses recherches. Comme ces ouvrages peuvent être utiles à de futurs chercheurs, ils ont été indiqués dans cette bibliographie.

AGRICULTURE / AGRICULTURE

During the last 15 years there has been a large increase in the amount of doctoral research done in the field of Canadian agriculture. Major research has been done in agricultural economics, agricultural engineering, Canadian agricultural products, agricultural geography, and agricultural history. The University of Manitoba leads the way in output of dissertations in these subjects areas, followed by the University of Toronto. In research on soil science, the University of Alberta is first, with the University of British Columbia a close second. The University of Guelph has completed the majority of research in plant culture and pathology. American universities produced twice as much in these three areas in the first 60 years of this century, but in the last 15 years, Canadian universities more than doubled the American output. Great Britain, from the 1940's through the 1970's, produced only nine dissertations, four of which came from the University of London.

In addition to the Canadian universities mentioned earlier, McGill University and the University of Saskatchewan, produced a respectable number of agricultural studies. Of the 31 American universities with dissertations in this classification, the universities of Minnesota, Cornell, Harvard, and Wisconsin produced the greatest number.

Au cours des 15 dernières années il y a eu un spectaculaire accroissement du nombre des thèses de doctorat dans le domaine de l'agriculture canadienne. La plus grande partie des recherches a porté sur l'économie agricole, l'ingénierie agricole, les différents produits de l'agriculture canadienne, la géographie agricole et l'histoire de l'agriculture. L'Université du Manitoba est celle qui a fourni le plus de thèses dans ces domaines, suivie par l'Université de Toronto. Dans les recherches sur la science des sols, l'Université de l'Alberta s'inscrit au premier rang, suivie de très près par celle de la Colombie-Britannique. L'Université Guelph se distingue par ses recherches sur la culture et la pathologie des plantes. Au cours des 60 premières années de ce siècle, les universités américaines, en ces trois domaines (sol, culture et pathologie des plantes), ont fourni deux fois plus de thèses que les universités canadiennes, mais l'inverse s'est produit dans les 15 dernières années où la production canadienne a plus que doublé la production américaine. La Grande-Bretagne, de 1940 à la fin de 1970, n'a présenté que 9 thèses, dont 4 à l'Université de Londres.

Il faut ajouter aux universités canadiennes mentionnées plus haut, l'Université McGill et celle de la Saskatchewan, qui ont fourni un nombre respectable d'études sur l'agriculture. Parmi les 31 universités américaines qui figurent dans cette classification, outre l'Université du Minnesota, il faut noter les universités Cornell, Harvard et du Wisconsin qui se sont placées au premier rang.

ANTHROPOLOGY/ ANTHROPOLOGIE

The major sub-classifications in anthropology deal with Native peoples of Canada, and cultural and urban anthropology. Very little doctoral research on Canadian anthropology came out of Canadian universities during the first 60 years of this century. Five times as many studies were produced in American universities. During the 1970's Canadian output increased dramatically and this trend continues into the 1980's.

Eighteen Canadian universities were responsible for the dissertations listed in Anthropology. The University of Toronto produced one-third of the total, and the Universities of British Columbia, Alberta, and McGill University placed second, third, and fourth respectively.

In the section on Native people, studies of the Metis, and of Indians in different provinces are presented. In the section on cultural anthropology, almost 30 ethnic and religious groups are examined through doctoral research.

Les principales sous-classifications en anthropologie portent sur les nombreux peuples autochtones du Canada et sur l'anthropologie culturelle et urbaine. Au cours des 60 premières années de ce siècle, très peu de thèses universitaires canadiennes ont abordé le thème de l'anthropologie canadienne. Pendant ce temps, les universités américaines faisaient cinq fois plus d'études à ce sujet. Les années 1970 ont vu un remarquable tournant en ce domaine et cette tendance s'est poursuivie dans les années 1980.

Les thèses d'anthropologie viennent de 18 universités canadiennes; l'Université de Toronto a fourni un tiers du total, suivie de l'Université de la Colombie-Britannique, l'Université de l'Alberta et l'Université McGill.

Dans la section des études sur les Autochtones, l'ouvrage présente des thèses sur les Métis et sur des Indiens de différentes provinces. En anthropologie culturelle, les thèses de doctorat traitent presque de 30 groupes ethniques et religieux.

ARCHAEOLOGY / ARCHÉOLOGIE

Apart from the recent studies in which the University of Calgary (27 titles) is the leader, followed by Toronto (12), only three other Canadian universities have produced doctoral studies in the field of Archaeology, Simon Fraser University, the University of British Columbia, and York University, make up the total of 47 titles. This has been matched by American universities who have produced 48 doctoral dissertations on this subject. Of the 26 universities involved, Wisconsin is first with six titles, followed by Washington, Seattle, Michigan, Michigan State, and Harvard with four titles each.

En dehors des récentes études pour lesquelles l'Université de Calgary (27 ouvrages) vient en tête, suivie par celle de Toronto (12), seulement trois autres universités canadiennes ont produit des thèses de doctorat en ce domaine, l'Université Simon Fraser (5), l'Université de la Colombie-Britannique (2) et l'Université York (1), ce qui fait un total de 47 ouvrages, qui rejoint à peu de chose près le total des universités américaines (48). Des 26 universités en cause, celle du Wisconsin est en tête avec 6 ouvrages suivie par Washington, Seattle, Michigan, Michigan State et Harvard, avec 4 ouvrages chacune.

ARCHITECTURE / ARCHITECTURE

This is another area where very little doctoral research has been pursued. Three Canadian universities have produced only five titles in the last seven years: Laval University (3), the University of Toronto (1), and Simon Fraser University (1). Five American universities have produced six titles, with Cornell responsible for two, and Columbia, Michigan, Oregon and Princeton, one each. Great Britain produced one title at the University of Edinburgh in 1975.

Il existe un autre domaine où très peu de thèses de doctorat ont été produites. Trois universités canadiennes ont fourni 5 ouvrages en tout au cours des 7 dernières années: l'Université Laval (3), l'Université de Toronto (1) et l'Université Simon Fraser (1). Six autres ouvrages sont redevables à 5 universités américaines: Cornell (2), Colombia, Michigan, Oregon et Princeton (un ouvrage chacune). La Grande-Bretagne a produit une thèse à l'Université d'Édimbourg en 1975.

ARTS/ARTS

Surprisingly, for a nation that has much to be proud of in the production of artistic works, very little doctoral research has been completed in this area. The Canadian and American universities are responsible for 11 dissertations each. The first 13 items are general studies of Canadian art, and the final nine deal with art of the Native people of Canada. Six Canadian universities have produced a total of 11 dissertations, with the University of Toronto contributing four. Eight American universities have produced 11 dissertations; Columbia (3) and Washington (Seattle), (2) are the leaders.

Il est surprenant de constater qu'au sein d'une nation, pourtant si fière de la production de ses oeuvres d'art, on retrouve si peu de thèses de doctorat sur ce domaine. Les universités canadiennes n'ont présenté respectivement que 11 thèses sur le sujet. Les 13 premiers ouvrages traitent de l'art canadien en général et les 9 derniers, de l'art des autochtones du Canada. Six universités canadiennes ont produit au total 11 thèses, dont 4 viennent de l'Université de Toronto. Huit universités américaines en ont produit 11: l'Université Columbia (3) et l'Université de Washington (Seattle) (2) se classent en tête.

MUSIC/MUSIQUE

This classification is composed of a number of general topics, such as the history of music in Canada, folk songs, Indian music, religious music, Canadian music, musicians and composers, and music education. It has not proved to be a strong area for advanced graduate research. Of the 63 items, 19 are in the area of music education. It is interesting to note that of the 18 doctoral studies of nine Canadian musicians and composers, only two were completed at Canadian universities. It is possible, of course, that a number of the studies completed in American universities may have been done by Canadians who elected to study music at American universities. Of the 27 American universities represented, Rochester (7), Columbia (6), and Indiana (4) were the leaders. Of the eight Canadian universities represented, Montreal (4) and Toronto (3) were the leaders. The bulk of research for all universities was completed in the 1970's and 1980's. The first American study, entitled "The Folk Songs of Canada," was produced at Harvard University in 1909. It was not until 1932, that another study was produced at Laval University on the evolution of religious music in French Canada.

Cette classification se compose d'un certain nombre d'études générales comme l'évolution de l'art musical au Canada, les chansons folkloriques, la musique indienne, la musique religieuse, la musique canadienne, les musiciens et les compositeurs ainsi que l'enseignement de la musique. Ce sujet ne tient pas une place très importante dans les études de doctorat. Avec 63 thèses, 19 d'entre elles portent sur l'enseignement de la musique. Il est intéressant de noter que, des 18 thèses de doctorat présentées par neuf musiciens et compositeurs canadiens, seulement deux ont été faites dans des universités canadiennes. Il est possible, naturellement, que certains Canadiens aient choisit d'étudier la musique dans des universités américaines. Des 27 universités américaines représentées, Rochester (7 thèses), Columbia (6) et Indiana (4) se sont révélées des chefs de file. De même, l'Université de Montréal (4 thèses) et l'Université de Toronto (3) se placent en tête des 8 universités canadiennes. Pour toutes les universités, la masse de recherche se situe dans les années 1970 à 1980. La première étude américaine intitulée "The Folk Songs of Canada" a été faite à l'Université Harvard en 1909. Ce n'est qu'en 1932 que l'Université Laval a produit une autre étude sur l'évolution de la musique religieuse au Canada français.

DRAMA AND THEATRE/ ART DRAMATIQUE ET THÉÂTRE

Interest in Canadian drama and theatre has suddenly come alive. In 1932, a pioneering effort was produced at McGill University, entitled "The French Theatre in Montreal, 1878-1931." Despite this, no other studies were completed until the 1970's which produced six. In the first four years of the 1980's, seven studies have been completed. The University of Toronto has dominated this field with a total of nine studies compared to one each by five other universities. American interest has also grown. After one study in the 1940's, seven were produced in the 1960's, eight in the 1970's and four thus far in the 1980's, making a total of 20. Of the 15 American universities producing dissertations in this area, Michigan (3), Wayne State (3), and Louisiana State (2) are the leaders, with the remaining 12 universities producing one dissertation each.

L'intérêt pour l'art dramatique et le théâtre canadien s'est soudainement éveillé. En 1932, un effort a été fait pour la première fois à l'Université McGill avec une thèse intitulée "The French Theatre in Montreal, 1878-1981". Depuis, il n'y en a pas eu jusque dans les années 1970, années au cours desquelles il en a paru six. De 1980 à 1984, il y a déjà eu 7 études. L'Université de Toronto s'est distinguée par un total de 9 thèses tandis que chacun des 5 autres établissements n'en présentait qu'une. Aux États-Unis, l'intérêt pour ce domaine a suivi la même courbe ascendante. Après une seule étude au cours des années 1940, il y en a eu 7 au cours des années 1960, 8 au cours des années 1970 et jusqu'à présent 4, de 1980 à 1984, ce qui fait un total de 20 études. Quinze universités américaines ont abordé ce sujet; Michigan (3 thèses) Wayne State (3) et Louisiana State (2) tiennent la tête du groupe, chacune des 12 universités restantes n'ayant produit qu'une thèse.

COMMUNICATIONS/ COMMUNICATIONS

This comparatively new field has just begun to capture the interest of Canadian and American students. American universities produced two dissertations concerning Canada in the 1960's, 13 in the 1970's, and only one so far in the 1980's, Canadian universities produced seven in the 1970's, and have already produced eight in the first four years of the 1980's.

In addition to general items, communication theory through the works of Harold Innis and Marshall McLuhan is examined, followed by public opinion and propaganda in Canada. Ten Canadian universities have produced dissertations in this field, the University of Toronto and McGill University are the leaders with three each.

Ce domaine relativement nouveau vient de commencer à retenir l'intérêt des étudiants canadiens et américains. Tandis que les universités américaines produisaient 2 thèses sur le Canada dans les années 1960, 13 dans les années 1970, et seulement une jusqu'à présent dans les années 1980, les universités canadiennes en ont produit 7 dans les années 1970, et ont déjà dépassé ce nombre dans l'actuelle décennie avec 8 thèses de 1980 à 1984.

Aux ouvrages d'intérêt général, il faut ajouter les études sur la théorie de la communication, avec les travaux d'Harold Innis et Marshall McLuhan, suivies par des travaux sur l'opinion publique et la propagande au Canada. Dix universités canadiennes ont aussi produit des thèses en ce domaine. L'Université de Toronto et l'Université McGill avec 3 thèses chacune se classent en tête du groupe.

JOURNALISM, THE PRESS, PERIODICALS, HISTORY OF THE PRESS/ JOURNALISME, PRESSE, PÉRIODIQUES ET HISTOIRE DE LA PRESSE

Thirty dissertations are found in this classification, with 20 from 12 Canadian universities, and ten from seven American universities. Fifteen of the Canadian titles were produced between 1970 and 1980. McGill University is the leader, and the University of Toronto, York University and the universities of Montreal and Ottawa follow with two dissertations each. Of the seven American universities, Minnesota produced four studies, and six other universities each produced one.

Dans cette classification, il y a 30 thèses, dont 20 proviennent de 12 universités canadiennes et 10, de 7 universités américaines. Quinze des thèses canadiennes ont paru dans les années 1970 et 1980. L'Université McGill est en tête du mouvement; les universités de Toronto, York, de Montréal et d'Ottawa suivent avec des thèses chacune. Des 7 universités américaines, celle du Minnesota est responsable de 4 études et les 6 autres universités d'une chacune.

FILM: COMMERCIAL AND EDUCATIONAL/ FILM COMMERCIAL ET ÉDUCATIF

Since doctoral research on films has grown considerably in the United States in recent years, it was thought advisable to provide a separate section for film even though the total number of studies is small. Of the ten dissertations listed, six are from four Canadian universities: McGill (2), Montreal (2), Alberta (1), and Simon Fraser (1). All were completed within the last five years. The four dissertations from the United States are from Ohio State (2), University of Southern California (1), and Stanford University (1).

Étant donné que les recherches sur les films se sont considérablement développées aux États-Unis ces dernières années, on a pensé qu'il était raisonnable de prévoir une section séparée pour les films, même si le nombre modeste des thèses sur ce sujet est peu élevé. Des 10 thèses énumérées, 6 sont dues à 4 universités canadiennes: l'Université McGill (2), l'Université de Montréal (2), l'Université de l'Alberta (1) et l'Université Simon Fraser (1). Toutes les thèses ont été terminées au cours des 5 dernières années. Les 4 thèses des États-Unis viennent des universités d'Ohio State (2), de Southern California (1) et de l'Université Stanford (1).

RADIO AND TELEVISION/RADIO ET TÉLÉVISION

This sector of the communications industry is divided into two sub-classifications: commercial and educational. It has been a recent subject for research, with the bulk of the dissertations appearing in the 1970's and 1980's. Of the 24 Canadian dissertations produced by 14 universities, the University of Toronto is the leader (8), followed by the University of Montreal (4), University of Western Ontario (3) and the University of British Columbia (2). The remaining ten schools produced one dissertation each. Of the 20 studies produced by 16 American universities, Stanford approved three, Michigan, Michigan State, and Wayne State approved two each, and the remaining 12 universities account for one each. Canada's increase in dissertations in the 1980's enabled it to exceed the United States in total output, 27 to 22. Twenty-nine of the total number were in the commercial area, and 20 in the educational. Canada produced 13 of that number, five from the University of Toronto.

Ce partie de l'industrie des communications se divise en deux sous-secteurs: commercial et éducatif. C'est là aussi un sujet de recherche récent, la majorité des études apparaissant dans les années 1970 et se poursuivant dans les années 1980. L'Université de Toronto avec 8 thèses, vient en tête des 14 universités ayant produit 24 thèses canadiennes sur le sujet; suivent dans l'ordre, l'Université de Montréal (4), l'Université Western Ontario (3) et l'Université de la Colombie-Britannique (2). Les dix autres universités du groupe comptent une thèse chacune. Aux États-Unis, 20 thèses ont été produites par 16 universités; l'Université de Stanford en a approuvé trois, celles de Michigan, de Michigan State et Wayne State chacune deux et enfin les 12 autres universités peuvent se prévaloir d'une thèse chacune. L'augmentation des thèses au Canada, de 1980 à 1984, a permis de surpasser le total des productions américaines, avec 27 thèses contre 22. Sur l'ensemble des thèses, 29 couvraient le domaine commercial et 20, celui de l'éducation. La contribution du Canada a été de 13, dont 5 pour l'Université de Toronto seulement.

ECONOMICS/ÉCONOMIE

The study of Canadian economics has been very popular, making it the fourth largest classification. Work on the subject was more prolific in American universities until the 1970's and 1980's, when graduate research in Canadian universities increased dramatically. In 1894, Columbia University produced the first dissertation, and in 1897, the University of Chicago produced the second dissertation on Canadian economics. In each of the decades prior to the 1970's, the American output exceeded the Canadian. However, in the first four years of the 1970's, the number of dissertations from Canadian universities increased with the University of Toronto producing one quarter of the Canadian total. McGill University, the universities of Western Ontario, British Columbia, and Queen's follow in that order. Among the American universities, Harvard is the leader with Chicago a distant second, and the University of California (Berkeley), the University of Michigan, Pennsylvania, and Columbia following in that order. Canadian economics is the second-largest area of Canadiana studied in British universities, with a total of 72 dissertations. Of the nine British universities represented in this area, London is the leader with a total of 44 studies, followed by Oxford (1), Cambridge (8), Manchester (4), Liverpool (2), and four other universities.

Les études en économie au Canada ont eu beaucoup de succès et constituent la quatrième plus importante classification. Les travaux en ce domaine ont été plus abondants dans les universités américaines dans les années 1970 et 1980; la recherche dans les universités canadiennes a également pris de l'extension. En 1894, en effet, l'Université Columbia faisait paraître la première thèse sur l'économie canadienne, et, en 1897, c'était le tour de l'Université de Chicago. Avant les années 1970, la production américaine avait surpassé celle du Canada. Cependant, de 1970 à 1974, le nombre des thèses canadiennes a augmenté grâce à l'Université de Toronto qui a produit environ un quart du nombre total des études canadiennes. Les universités McGill et Western Ontario, l'Université de la Colombie-Britannique et l'Université Queen suivent, dans l'ordre. Quant aux universités américaines, l'Université Harvard mène le mouvement, l'Université de Chicago vient en seconde place, à bonne distance, et ensuite les universités California (Berkeley), Michigan, Pennsylvania et Columbia, chacune à son rang. L'économie canadienne occupe la seconde place parmi les sujets d'études de quelque importance sur le Canada, auxquels s'intéressent les universités britanniques avec un total de 72 thèses en ce domaine. Des 9 universités britanniques, l'Université de Londres mène le jeu avec un total de 44 thèses, suivi par Oxford (1), Cambridge (8), Manchester (4), Liverpool (2) et 4 autres universités (une thèse chacune).

EDUCATION/ÉDUCATION

More doctoral dissertations have been produced in this classification than in any other subject area. The University of Toronto, which accounts for 31 percent of the total, produced the first doctorate in this field in 1903, followed in 1907 by Teachers College, Columbia. The 1970's and 1980's witnessed the heaviest growth in doctoral work, quadrupling the output of the previous 60 years. The statistics for the first four years of the 1980's promise another period of growth. Five universities in Great Britain produced 14 titles, with the University of London the leader.

Il y a eu plus d'études de doctorat dans ce domaine que dans aucun autre. L'Université de Toronto qui compte 31 pour 100 du total a été la première université à accorder un doctorat en ce domaine en 1903, suivie en 1907 par Teachers College et Columbia. Les années 1970 et 1980 ont connu la plus grande poussée, quadruplant la production des 60 années précédentes. Les statistiques de 1980 à 1984 promettent dix autres années brillantes. Cinq universités en Grande-Bretagne ont produit 14 thèses, l'Université de Londres venant en tête.

ENGINEERING/INGÉNIERIE

This section has been sub-classified by region rather than under headings.

The bulk of research in this area was produced in Canadian universities, and the major part was completed during the 1970's. The American output amounts to a little more than one-fifth (22) of the total (124). Of the 22 Canadian universities producing dissertations in engineering, Alberta, Toronto, Waterloo, and McGill are the leaders. Of the 17 American universities involved, most produced only one item. The University of Buffalo is the leader (4), with its research centering around Lake Erie (3) and Lake Ontario (1).

Cette section est organisée par sous-classifications régionales plutôt que par vedettes.

La majorité des thèses en ce domaine vient des universités canadiennes et la plupart des thèses datent des années 1970. La production américaine est d'un peu plus d'un cinquième (22) du total (124). Des 22 universités canadiennes qui ont produit des thèses en ingénierie, les universités de l'Alberta, de Toronto, de Waterloo ainsi que McGill ont été les plus actives. Des 17 universités américaines qui se sont intéressées à ces études, la plupart n'ont produit qu'une seule thèse. L'Université de Buffalo vient en tête avec 4 thèses, dont trois traitent du lac Érié et une du lac Ontario.

GEOGRAPHY / GÉOGRAPHIE

Geographical studies is one of the areas in which scholars have demonstrated a growing interest during the last 15 years. The University of Chicago approved the first doctorate in this discipline in 1914. Output from American universities grew slowly until the 1960's and 1970's. Similarly, dissertations from Canadian universities were limited until the 1970's, when a dramatic increase occured. Of the universities producing 20 titles or more, Toronto is the leader with British Columbia, McGill, Western Ontario, McMaster, and Alberta following in that order. In the United States, among the 37 universities producing dissertations in this classification, 17 produced only one title. the Universities of Michigan (15), Washington (Seattle) (13), Clark (13), and Chicago (12) are the major contributors. Twenty-six titles were produced in Great Britain from nine universities, with London approving nine. In addition to general items, regional geography, economic geography, historical geography, political geography, and urban geography are the main headings.

La géographie représente l'un des importants secteurs pour lesquels les chercheurs ont montré un intérêt au cours des 15 dernières années. L'Université de Chicago a accordé le premier doctorat en cette discipline en 1914. Dans les universités américaines, le nombre des thèses a augmenté lentement jusque vers les années 1960 et 1970. De même dans les universités canadiennes, il n'y a pas eu de progrès notable jusqu'aux années 1970, année à partir de laquelle la production a beaucoup augmentée. Parmi les universités produisant 20 ouvrages ou plus, celle de Toronto se distingue une fois encore, suivie, dans l'ordre, par les universités de la Colombie-Britannique, McGill, Western Ontario, McMaster et de l'Alberta. Aux États-Unis, des 37 universités qui ont produit des thèses en ce domaine, 17 n'ont qu'un seul ouvrage à faire valoir. Les universités du Michigan (15), de Washington (Seattle) (13), Clark (13) et de Chicago (12) sont celles qui ont le plus contribué à la production de thèses en géographie. Vingt-six thèses ont été présentées en Grande-Bretagne dans neuf universités; Londres, pour sa part, en a approuvé neuf. Aux études d'ordre général, il faut ajouter des travaux sur la géographie régionale, économique, historique, politique et urbaine.

CLIMATE AND METEOROLOGY/ CLIMAT ET MÉTÉOROLOGIE

As with most of the other disciplines, the bulk of the research in this category was completed during the 1970's. The total number of studies is quite small, with American output slightly more than half of the Canadian number. Of the 13 universities working in this area, McGill is the major producer with almost two-fifths of the total to its credit. The Universities of Toronto, British Columbia, and McMaster, follow in that order. Among the 14 American universities, Wisconsin, Michigan, and Clark rank first, second and third, but with comparatively few titles to their credit. Great Britain can point to three titles in this classification, two from the University of London and one from the University of East Anglia.

Comme dans la plupart des autres disciplines, la grande partie des recherches en cette catégorie s'est effectué dans les années 1970. Le nombre total de thèses est assez réduit et la production américaine se tient légèrement au-dessus de la moitié du nombre canadien. L'Université McGill est la plus active des 13 établissements travaillant en ce domaine, avec presque deux cinquièmes du total à son crédit. Les universités de Toronto, de la Colombie-Britannique et McMaster suivent, loin derrière l'Université McGill. Parmi les 14 universités américaines, celles du Wisconsin, du Michigan et Clark occupent les trois premières places, mais avec comparativement peu de thèses à offrir. Dans cette classification, la Grande-Bretagne détient trois ouvrages, deux à l'Université de Londres et un à l'Université d'East Anglia.

GEOLOGY/GÉOLOGIE

This classification is one of the most thoroughly explored areas, ranking second only to education. John Hopkins University offered the first study in 1888, followed by the Universities of Columbia and Chicago in 1895, and Columbia again in 1899, (preceding the University of Toronto by five years). For the first half of this century, American universities produced considerably more research than Canadian schools, but from the 1960's on, the Canadian output increased markedly. In the United States, Princeton University is the leading contributor, with the Universities of Wisconsin, Yale, Harvard, Columbia, and Michigan following in that order. In Canada, McGill University is the outstanding contributor, with the University of Toronto a close second. Queen's University ranks third, ahead of the Universities of British Columbia, Alberta, McMaster, and Western Ontario, which occur in that order. Geology ranks fourth in output of British studies of Canada.

Cette catégorie est l'une des plus étudiées; elle vient au second rang, après l'éducation. C'est à l'Université Johns Hopkins que revient la première étude, en 1888; elle a été suivie par les universités Columbia et Chicago en 1895, et de nouveau Columbia en 1899 (précédant l'Université de Toronto de cinq ans). Dans la première moitié du siècle, les universités américaines ont produit bien plus que les universités canadiennes, mais depuis 1960, la production canadienne a progressé de façon marquée. Aux États-Unis, l'Université Princeton vient en tête, suivie dans l'ordre, par les universités du Wisconsin, de Yale, de Harvard, de Columbia et du Michigan. Au Canada, l'Université McGill se classe bien avant les autres établissements; l'Université de Toronto suit d'assez près. L'Université Queen's reste au troisième rang, tout en distançant nettement les universités de la Colombie-Britannique, de l'Alberta, McMaster et Western Ontario, toutes citées dans l'ordre. La géologie occupe le quatrième rang des disciplines étudiées dans les ouvrages britanniques sur le Canada.

(Stratigraphy, geochemistry, glaciology, metallurgy, mineralogy, petrology, etc.)/ (Stratigraphie, géochimie, glaciologie métallurgie, minéralogie, pétrologie, etc.)

PALEONTOLOGY/ PALÉONTOLOGIE

(Paleobotany, paleobiology, paleozoology)/ (Paléobotanie, paléobiologie, paléozoologie)

After a marked increase in output in the 1970's, (23) from Canadian universities, the first four years of this decade have not continued the rapid growth observed in other disciplines. There seems to be a lull in American doctoral research in the eighties as well, with only three dissertations produced so far, compared to 15 in the 1970's and 1960's. Twenty-seven American universities have approved a total of 46 dissertations. The University of Michigan is the leader with six studies. The universities of Harvard, Iowa, Colorado, Princeton and Ohio State have produced three studies each, and Oregon State, Stanford University, the University of Kansas, and Columbia have produced two each. Of the twelve Canadian universities with students working at the doctorate level in this area, Toronto leads with 10 studies, followed by Waterloo, McGill, and British Columbia with four each. The universities of McMaster, Alberta and Saskatchewan have each approved three doctoral studies while the universities of New Brunswick, Ottawa and Western Ontario have approved two and Dalhousie and Queen's each have one approved graduate dissertation.

Four British universities produced three studies in the 1960's, and five in the 1970's; London and Bristol three each, and Cambridge and Wales, each produced one doctoral dissertation.

De 1970 à 1980, on a pu noter une nette augmentation du nombre de thèses dans les universités canadiennes, mais le mouvement ne s'est pas poursuivi dans les années 1980 et il n'y a pas eu d'augmentation de la production comme dans d'autres disciplines. La recherche américaine au niveau des études de doctorat semble diminuer dans les années 1980, si l'on en juge par les trois seules thèses qui ont été produites jusqu'à maintenant, alors que les années 1960 et 1970, on en comptaient quinze. Vingt-sept universités américaines ont approuvé un total de 46 thèses. L'Université du Michigan vient en tête, avec 6 thèses, suivie des universités Harvard, Iowa, Colorado, Princeton et Ohio State qui ont produit chacune trois études, et Oregon State, Stanford, Kansas et Columbia avec chacune deux thèses. Des 12 universités canadiennes qui ont travaillé au niveau du doctorat en ce domaine, l'Université de Toronto a produit 10 thèses, suivie par les universités Waterloo, McGill et de la Colombie-Britannique avec quatre chacune, les universités McMaster, de l'Alberta et de la Saskatchewan avec chacune trois, celle du Nouveau-Brunswick, d'Ottawa et Western Ontario avec deux et enfin, celles de Dalhousie et Queen n'en ont produit qu'une.

Quatre universités britanniques ont accordé trois doctorats dans les années 1960 et cinq dans les années 1970; les universités de Londres et Bristol en comptent chacune trois, celles de Cambridge et Wales chacune une.

GEOPHYSICS/GÉOPHYSIQUE

The first five Canadian doctorates in geophysics were earned in the 1950's. This number increased to 12 in the 1960's, and quadrupled in the 1970's. The first American doctorate in geophysics was granted during the 1940's. The output increased each decade, paralleling the Canadian output, but at a much slower pace. Among the 15 Canadian universities engaged in advanced studies in geophysics. Toronto and British Columbia rank number one and two in output. Columbia University and the University of Washington (Seattle), rate number one and two among American universities, but with far fewer titles to their credit. Only one dissertation from Great Britain is listed; it was produced at Cambridge in 1969.

C'est dans les années 1950 que les cinq premiers doctorats canadiens en géophysique ont été décernés. Ce nombre s'est accru jusqu'à douze dans les années 1960 et a quadruplé dans les années 1970. Aux États-Unis, le premier doctorat en géophysique a été octroyé dans les années 1940. De décade en décade, la production a augmenté, parallèlement à la production canadienne, mais à rythme beaucoup plus lent. Parmi les 15 universités canadiennes qui se sont lancées dans les études avancées en géophysique, l'Université de Toronto et celle de la Colombie-Britannique se classent aux premiers rangs. Aux États-Unis, les universités Columbia et de Washington (Seattle) occupent ces rangs même si elles détiennent un plus petit nombre d'études. On ne relève qu'une seule thèse provenant de la Grande-Bretagne; elle a été présentée à Cambridge en 1969.

HEALTH SCIENCES/ SCIENCES DE LA SANTÉ

The health sciences include, public health services and care, health science, health education, mental health, alcoholism, drugs, diet and nutrition, hospital administration, economics and services, doctors and medicine, medical education, medical science and research, veterinary science, dentists and dentistry, pharmacy and pharmacists, and nursing, nursing education, the profession of nursing, and science of nursing. These subjects became popular as a field for advanced research in Canada in the 1970's and 1980's. The last four years have produced almost as many dissertations as the entire 1970's. Prior to 1970, only one study in 1934, three in the 1950's, and four in the 1960's, had been done in Canada. Compare those figures with over 100 in the 1970's. The University of Toronto has produced three times as many dissertations in this field as McGill University and the University of Alberta, which ranks second in output. The Universities of British Columbia, Montreal, and Ottawa are third, fourth, and fifth respectively. The American output is considerably less than the Canadian output. Almost half of this total appeared in the 1970's. Of the 35 universities producing dissertations in this area, Columbia University produced the most (14), with the remaining 34 universities ranging in output from four to one. Eight universities in Britain produced a total of 13 studies, five from the University of London.

Les sciences de la santé couvrent les services et les soins de santé publique, les sciences de la santé, l'enseignement portant sur le nursing (santé), la santé mentale, l'alcoolisme, les narcotiques, l'alimentation et la nutrition, les hôpitaux (administration, rentabilité et services), les médecins et la médecine, l'enseignement médical, la science et la recherche médicales, la science vétérinaire, les dentistes et l'art dentaire, la pharmacie et les pharmaciens, le nursing, la formation des infirmières, la profession infirmière et les sciences infirmières. Les sciences de la santé ont fait l'objet de recherche avancée au Canada dans les années 1970 et 1980. Au cours des quatre dernières années, on a compté presque autant de thèses que dans l'ensemble des années 1970. Avant cette date, on n'avait eu au Canada qu'une étude en 1934, trois dans les années 1950 et quatre entre 1960 et 1970. Il est intéressant de comparer ces chiffres avec les 100 thèses et plus des années 1970. L'Université de Toronto a produit trois fois autant de thèses en ce domaine que les universités McGill et de l'Alberta, qui viennent au second rang; les universités de la Colombie-Britannique, de Montréal et d'Ottawa sont respectivement au troisième, quatrième et cinquième rang. La production américaine est moins importante que celle du Canada; presque la moitié de ce total date des années 1970. Des 35 universités qui ont produit des thèses en ce domaine, c'est l'Université Columbia qui peut se prévaloir du plus grand nombre (14); les 34 autres ont des productions variant de quatre thèses à une seule. Huit universités de Grande-Bretagne ont produit un total de 13 études, dont cinq à l'Université de Londres.

HISTORY/HISTOIRE

Prior to 1970, the American output in this classification had exceeded that of Canadian universities but, as in all other areas, the rapid growth in output that occured during the 1970's and 1980's brought the Canadian total up to the American level. An extrapolation of the statistics demonstrates that the Canadian output will probably exceed the American output for the remainder of this decade. Included in this classification is the first doctoral dissertation written on a Canadian topic, Thomas D. Rambaut's "A Sketch of the Constitutional History of Canada," accepted by Columbia University in 1884. Four more studies appeared in the 1890's (two from Cornell University and two from Johns Hopkins University), followed by 17 more in the next two decades. It was in the 1920's that the first three Canadian dissertations on Canadian history were approved. Of the 80 American universities producing studies in this area, none of the universities has emerged as a significant centre for Canadiana, although the schools of Harvard, Duke, Columbia, Chicago, Minnesota, Illinois, Michigan, and Yale, in that order, were major contributors, with ten or more titles each. In Canada, the University of Toronto has emerged as the major producer with the University of Ottawa second, but with only one-third of Toronto's output. The universities of Laval, Queen's, and Montreal vie for third place and McGill University, the universities of Western Ontario, Alberta, and York follow in that order. Eleven additional universities contributed the remainder, with one to seven dissertations each.

This classification placed number one in British studies of Canada, with the University of London producing 38 of a total of 83 dissertations. Of the remaining ten

British universities contributing to this number, Oxford is second with 18 studies, and Cambridge third with seven.

Avant 1970, la production américaine dans cette catégorie surpassait celle des universités canadiennes, mais, comme dans tous les autres domaines, une rapide augmentation de la production dans les années 1970 et 1980 ont fait grimper le total des productions canadiennes au niveau du total américain. Une extrapolation des statistiques indique que la production canadienne excèdera probablement la production américaine à la fin de l'actuelle décennie. Dans cette catégorie, on trouve la première thèse de doctorat écrite sur un sujet canadien, "A Sketch of the Constitutional History of Canada" de Thomas D. Rambaut, acceptée par l'Université Concordia en 1884. Quatre autres thèses sont apparues dans les années 1890 (deux de l'Université Cornell et deux de l'Université Johns Hopkins), suivies par 17 de plus dans les deux décennies suivantes. C'est dans les années 1920 que les trois premières thèses canadiennes sur l'histoire canadienne ont été approuvées. Sur les quelque 80 universités américaines qui ont produit des thèses en ce domaine, il n'en est pas une qui ait réussi à devenir un centre intéressant pour les ouvrages canadiens, bien que les universités de Harvard, Duke, Columbia, Chicago, Minnesota, Illinois, Michigan et Yale, citées ici dans l'ordre, aient été d'importants producteurs, avec dix titres ou plus par établissement. Au Canada, l'Université de Toronto vient en tête suivie de l'Université d'Ottawa avec seulement un tiers de la production de Toronto. Les universités Laval, Queen's et de Montréal se disputent la troisième place; viennent ensuite, dans l'ordre, McGill, Western Ontario, Alberta et York. Onze autre universités se partagent les autres thèses, comptant de une à sept études chacune.

Dans cette catégorie, les études britanniques sur le Canada viennent au premier rang; l'Université de Londres a produit 38 thèses sur un total de 83. Dix autres universités britanniques se partagent les thèses restantes; Oxford arrive au second rang avec 18 thèses et Cambridge troisième, avec sept.

IMMIGRATION AND MIGRATION/ IMMIGRATION ET MIGRATION

The general heading of "Immigration" enables the compiler to piece together an interesting mosaic of theses dealing with 25 nationalities or specific groups in Canada, ranging from Americans to Yugoslavs. Also included are theses dealing with domestic migration, the history of Canadian alien and immigration policy, migration to and from Canada, and immigration, migration, and the economy.

While the first theses dealing with the subject appeared in Canada in the 1920's, in the United States, Yale University approved one as early as 1904, and several others appeared in the first decade of this century. Few others were approved on either side of the border over the next fifty years until the 1970's. Canada has approved as many as 36 theses in the last 14 years, twice as many as the 18 which appeared in the United States, making a total of 53 for Canada and 47 for the United States. Again, the University of Toronto is the major contributor with 28 theses and McGill University is second with seven. Of the remaining thirteen Canadian universities producing dissertations in this area, Montreal and Queen's approved five theses each. Of the 26 American universities, Harvard produced six, Yale six, Columbia five, California (Berkeley) three, Duke three, and Minnesota three. Twenty other American universities produced one thesis each. Of the ten British universities which produced 17 studies, London is the leader, with seven to its credit.

Le titre général d'"Immigration" permet au compilateur de réunir une intéressante mosaïque de thèses touchant 25 nationalités et groupes spécifiques au Canada, allant des Américains aux Yougoslaves. Il y a aussi des thèses sur les migrations internes, sur l'histoire de la politique canadienne en matière d'immigration et de sujets étrangers, sur les migrations vers le Canada ou à partir du Canada ainsi que sur les questions d'immigration et de migration liées à l'économie.

Les premières thèses dans ce domaine sont apparues au Canada dans les années 1920, alors que l'Université Yale, aux États-Unis, en avait déjà approuvé une dès 1904, et plusieurs autres avaient été écrites entre 1900 et 1910. Que ce soit d'un côté ou de l'autre de la frontière, il n'y a eu que très peu de thèses au cours des 50 années qui ont suivi, jusqu'en 1970. Dans les 14 dernières années, le Canada en a approuvé 36, deux fois autant que la production des États-Unis pendant cette période. Au total, on compte 53 thèses pour le Canada et 47 pour les États-Unis. De nouveau, l'Université de Toronto se trouve au premier rang (28) et McGill au second (7). Parmi les 13 universités canadiennes qui s'intéressent à ce domaine, Montréal et Queen's ont approuvé cinq thèses chacune. Des 26 universités américaines, les universités Harvard et Yale ont approuvé 6 thèses chacune, Columbia (5) California (Berkeley) Duke et Minnesota, trois chacune. Les 20 universités restantes n'ont à leur actif qu'une thèse chacune. Dix universités britanniques ont également produit 17 thèses sur ce sujet; pour sa part, l'Université de Londres est en tête avec sept thèses.

See also Law: Immigration and Alien Law/Voir aussi Émigration et droit étranger

LANGUAGE/LANGUE

Included under this heading is a sizeable section dealing with bilingualism, and the learning and teaching of a second language. Studies on Canadian English, French in Canada, German, Ukrainian, and the numerous Native languages are also included.

The first studies approved, date back to 1892 at John Hopkins University, Clark University (1894) and Harvard and Columbia (1904). The first Canadian dissertation in this category was produced at the University of Toronto in 1913. Only another 15 Canadian dissertations followed in the next half-century. However, the 1970's and 1980's have added substantially to this number.

The same observation can be made for the American universities which, in the last fourteen years doubled their output from all previous years. Over the same period of time three titles were produced in Great Britain, two at the University of London and one at the University of Edinburgh.

Sous ce titre, on trouve une section importante touchant au bilinguisme ainsi qu'à l'apprentissage et à l'enseignement d'une langue seconde; la section comprend aussi des thèses sur l'anglais canadien, le français du Canada, l'allemand, l'ukrainien et de nombreuses langues autochtones.

Les premiers travaux américains datent de 1892 à l'Université Johns Hopkins; les universités Clark (1894), Harvard et Columbia (1904) en ont produit à leur tour. La première thèse canadienne a été rédigée à l'Université de Toronto en 1913. Au cours du demi-siècle suivant, il n'y a eu que 15 thèses canadiennes. Les années 1970 et 1980 ont largement augmenté le nombre.

On peut faire la même observation pour les universités américaines qui, dans les 14 dernières années, ont doublé leur production de toutes les années précédentes. Au cours de cette période, il y a eu trois ouvrages en Grande-Bretagne dont deux à l'Université de Londres et un à Édimbourg.

LAW/DROIT

The legal classifications in the Table of Contents contain a wide range of topics, including an historical section on early Canadian law, provincial law, and the courts.

The first dissertation in law was approved at McGill University in 1918. During the 1970's Canada produced a total of 86 dissertations, the United States produced 24 and Great Britain produced 33. The universities generating the largest number of dissertations were: Montreal (18), Ottawa (17), Laval (14), Alberta (7), McGill (13), and York (12) Toronto (6), British Columbia (2), and Queen's (2). The University of British Columbia produced the first doctorate in legal study in 1926.

Among the British universities only four produced studies in this area: London (20), Oxford (9), Cambridge (2), and Edinburgh (2).

Les classifications juridiques de la table des matières contiennent une grande variété de sujets, dont une section historique sur les premières lois canadiennes et provinciales et sur les premiers tribunaux.

En 1918, McGill a approuvé la première thèse en droit. Au cours des années 1970, le Canada a produit un total de 86 thèses, les États-Unis (24) et la Grande-Bretagne (33). Les universités qui viennent en tête sont: Montréal (18), Ottawa (17), Laval (14), Alberta (7), McGill (13) et York (12), Toronto (6), Colombie-Britannique (2) enfin Queen's (2). L'Université de la Colombie-Britannique a produit le premier doctorat en droit en 1926.

Seulement quatre universités britanniques ont présenté des études sur ce sujet: Londres (20), Oxford (9), Cambridge (2) et Édimbourg (2).

LIBRARIES AND LIBRARY SCIENCE/BIBLIOTHÈQUES ET BIBLIOTHÉCONOMIE

Four Canadian universities have granted a total of 15 doctorates in library studies. The University of Toronto, has produced the largest number (10), followed by the University of Western Ontario (2), Queen's University (2), and the University of Ottawa (1). The University of Toronto has the honour of being the first university to approve the first study in this area in 1912, and another in 1917. It was not until the 1960's that another doctorate was granted, followed by two in the 1970's and ten in the first four years of the 1980's. Sixteen American universities have produced 28 titles: Chicago (5), Columbia (4), Michigan (3), Rutgers (2), Florida State (2), Illinois (2), and the remaning ten universities, one each. In Great Britain, the University of London produced one thesis in 1980.

After a listing of general items, the national, provincial, and municipal systems are studied, in addition to lower school, university libraries and library schools.

Perhaps an explanation for the comparatively small number of doctorates in this profession lies in the fact that a master's degree in library studies is generally sufficient for employment.

Seulement quatre universités canadiennes ont accordé un total de 15 doctorats en bibliothéconomie. L'Université de Toronto a eu la plus forte production (10), suivie par Western Ontario (2), Queen's (2) et Ottawa (1). L'Université de Toronto a été la première université canadienne à approuver des thèses en cette discipline en 1912 puis en 1917. Ce n'est ensuite qu'au cours des années 1960 qu'un autre doctorat a été accordé, suivi par deux autres dans les années 1970 et dix entre 1980 et 1984. Seize universités américaines ont produit 28 ouvrages: Chicago (5), Columbia (4), Michigan (3), Rutgers (2), Florida State (2), Illinois (2) et les dix universités restantes, une chacune. En Grande-Bretagne, l'Université de Londres a produit une thèse en 1980.

Après une liste d'études portant sur des sujets généraux, on trouve des thèses sur les organismes nationaux, provinciaux et municipaux qui s'ajoutent aux thèses sur les bibliothèques universitaires, sur celles des établissements d'enseignement de moindre importance et enfin sur les écoles de bibliothéconomie.

L'explication du nombre relativement modeste de doctorats en cette discipline réside peut-être dans le fait qu'une maîtrise en bibliothéconomie suffit généralement pour trouver un emploi.

LITERATURE/LITTÉRATURE

Canadian literature has always been popular as a subject for doctoral research in Canadian graduate schools. There has been a tremendous growth of interest during the 1970's and 1980's, however American research in Canadian literature was minimal until the 1970's. It is interesting to note that of the American total of 69, 20 of the more recent studies were on Malcolm Lowry, an adopted son.

Twenty Canadian universities have engaged in doctoral research in this area with widely varying output. The leaders are the universities of Laval, Ottawa, Montreal, Toronto, York, New Brunswick, Queen's, McGill, British Columbia, Alberta, Western Ontario, Sherbrooke, Dalhousie, Memorial University of Newfoundland, McMaster, Calgary, Manitoba, Saskatchewan, Simon Fraser, and Saint Paul, in that order. There is wide disparity between the numbers produced by the first few universities and the last ten. It should be noted that eight universities of major stature did not produce dissertations in this area. The number of theses completed in the 1980's, thus far, indicated that this decade will surpass the 1970's in output.

Among the 35 American universities represented, 20 produced one dissertation. Columbia University produced nine, the University of Indiana six, the University of Harvard and the University of Pennsylvania each produced five doctoral dissertations on this subject.

British universities produced 16 items, three of which are studies of Malcolm Lowry and most were completed during the 1970's and 1980's. The earliest studies were accepted at the University of Glasgow in 1927, followed by one at the University of London in 1930, and one at the University of Aberdeen in 1934. The remainder were produced much later.

La littérature canadienne a toujours été un sujet de thèse très recherché dans les établissements d'enseignement supérieur du Canada. Une recrudescence extraordinaire de l'intérêt est observée dans les années 1970 et 1980. Jusqu'en 1970, la recherche américaine en littérature canadienne a été minime. Il est intéressant de constater que sur un total de 69 thèses en Amérique, 20 des plus récentes étaient sur Malcolm Lowry, que les Canadiens ont adopté pour l'un des leurs.

Vingt universités canadiennes ont approuvé des thèses en ce domaine et la production est extrêmement variée. Les universités Laval, d'Ottawa, de Montréal et de Toronto sont en tête, puis viennent dans l'ordre, les universités York, du Nouveau-Brunswick, Queen's, McGill, de la Colombie-Britannique, de l'Alberta, Western Ontario, de Sherbrooke, Dalhousie, Memorial, McMaster, celle de Calgary, du Manitoba, Simon Fraser et Saint Paul. Il existe une grande différence entre le nombre de thèses produites par les premières universités citées et les dix dernières. Il faut noter que huit universités très importantes n'ont pas produit une seule thèse en littérature. Le nombre des thèses rédigées dans les années 1980, jusqu'à présent, indique que la production de cette décennie surpassera celle des années 1970.

Parmi les 35 universités américaines représentées, 20 n'ont produit qu'une seule thèse. Les universités Columbia (9 thèses), Indiana (6), Harvard (5) et Pennsylvania (5) sont en tête.

Les universités britanniques ont produit 16 thèses, dont trois sur Malcolm Lowry; la plupart ont été rédigées dans les années 1970 et 1980. Les plus anciennes thèses ont été acceptées à Glasgow en 1927, suivies par une thèse à Londres en 1930 et une autre à Aberdeen en 1934. Les autres ont été produites plus tard.

POLITICS/POLITIQUE

It is interesting to observe that Canadian politics is one of the areas in which American output in doctoral research exceeds the Canadian. However, it appears that in the 1980's, the Canadian total will surpass that of the United States. Of the 19 Canadian universities with political doctorates to their credit, the University of Toronto has produced more than three times the output of Carleton University, which holds second place. Queen's University, and the University of Alberta, McGill, York, Laval, Ottawa, and McMaster follow with ten or more doctorates each. Among the numerous American universities, Duke has been the most productive, with Columbia second, and Harvard a close third. The universities of Michigan, Chicago, Illinois, and Johns Hopkins follow with ten or more doctorates to their credit.

Twelve British universities have produced 46 titles, with London (23) and Oxford (17) dominating, and Cambridge (3), Exeter (1), Essex (1), and Manchester (1) completing the list.

Il est intéressant d'observer que la politique canadienne est l'un des secteurs où la production américaine de thèses de doctorat dépasse celle du Canada. Cependant, il semble que dans les années 1980, le total canadien surpas-sera celui des États-Unis. Des 19 universités canadiennes qui ont à leur crédit des thèses de doctorat sur la politique, l'Université de Toronto a produit trois fois plus d'études que l'Université Carleton, qui vient au second rang. Les universités Queen's, de l'Alberta, McGill, York, Laval, d'Ottawa et McMaster suivent avec dix doctorats ou plus chacune. Parmi les nombreuses universités américaines, Duke a été la plus productive, suivie de Columbia, puis de Harvard. Les universités du Michigan, de Chicago, de l'Illinois et Johns Hopkins suivent avec dix doctorats ou plus à leur crédit.

Douze universités britanniques ont produit 46 thèses, avec Londres (23) et Oxford (17) en tête; Cambridge (3), Exeter (1), Essex (1) et Manchester (1) complètent la liste.

PSYCHOLOGY/PSYCHOLOGIE

Canadian psychology, the fifth largest classification, is unique in that almost all of the approximately 1000 dissertations have been completed in Canadian universities, while only 15 were produced in the United States. None came from Great Britain. This field has greatly expanded during the last 15 years. Three dissertations were produced by the University of Toronto in the 1920's, four by Toronto and McGill in the 1940's, eleven in the 1950's (ten by the University of Ottawa), and 41 in the 1960's. The 1970's saw a huge increase in the number of dissertations produced, and the first four years of the 1980's are continuing this trend. Of the 23 Canadian universities producing dissertations in psychology, Toronto is the leader in output, with York a close second, and Ottawa and Montreal close behind.

The major sub-classifications include general psychology, clinical psychology (with numerous sub-classifications), developmental, counseling, educational, experimental, military, industrial, and social, psychology.

Les études de psychologie, qui forment la cinquième plus vaste classification, représentent une collection unique du fait que presque toutes ces 1000 thèses (approximativement) ont été rédigées dans des universités canadiennes; on en compte une quinzaine aux États-Unis et aucune ne vient de Grande-Bretagne. C'est seulement dans les 15 dernières années que cette discipline s'est véritablement affirmée. L'Université de Toronto a produit trois thèses dans les années 1920; les universités de Toronto et McGill, ensemble, quatre thèses dans les années 1940; onze thèses ont paru dans les années 1950 (dont 10 à l'Université d'Ottawa) et 41 dans les années 1960. Le barrage a sauté dans les années 1970 et, de 1980 à 1984, plus de thèses ont été produites que dans les années 1970. Des 23 universités canadiennes qui ont produit des thèses de psychologie, celle de Toronto vient au premier rang suivie de près par York, Ottawa et Montréal.

Parmi les principales sous-classifications, se trouvent des thèses portant sur la psychologie en général, la psychologie clinique (subdivisée en de nombreuses sections), la psychologie du développement, la psychologie éducative, expérimentale, militaire, industrielle et sociale.

RELIGION/RELIGION

Examining the almost 300 titles in this classification, we find that Canadian universities had a five-fold increase in the 1970's over the amount produced in the 1960's. In addition to a number of general items, Canadian religious history is examined in some depth, along with numerous other religious denominations in Canada. A fairly large number of dissertations are listed, examining Canadian religious personalities; the church and state in Canada; the psychology and sociology of religion; and finally, religion and education in elementary and secondary schools, colleges and universities. On the American side, Columbia University produced the first dissertation on religion in 1911, whereas it was not until the 1920's that the University of Toronto provided its first study.

Eleven dissertations were produced by six British universities, with Edinburgh (3) and Oxford (3) the leaders.

En examinant les 300 ouvrages de cette section, il appert que, dans les années 1970, les universités canadiennes ont eu une production cinq fois plus élevée que dans les années 1960. Outre un certain nombre d'ouvrages généraux, d'autres thèses étudient en profondeur l'histoire religieuse du Canada, en même temps que les nombreuses confessions religieuses ayant des représentants au Canada. Il existe un assez grand nombre de thèses sur des personnalités religieuses du Canada; certaines traitent de l'Église et de l'État au Canada, de la psychologie et de la sociologie du point de vue religieux et, finalement de la religion et de l'enseignement dans les écoles élémentaires et secondaires, les collèges et les universités. Du côté américain, l'Université Columbia a accordé le premier doctorat en religion en 1911 et ce n'est que dans les années 1920 que l'Université de Toronto a approuvé sa première thèse en cette discipline.

Onze thèses proviennent d'universités britanniques avec Édimbourg et Oxford avec trois thèses chacune.

SOCIOLOGY / SOCIOLOGIE

Research in the numerous sub-classifications of sociology has come of age in Canadian society. There was very little doctoral research done in this area between 1920 and 1970. One dissertation was produced in the 1930's, two in the 1940's, four in the 1950's, 22 in the 1960's, and ten times that number in the 1970's. The eighties give evidence of surpassing that total.

Of the twenty Canadian universities producing dissertations in this area, the University of Toronto, has contributed forty percent of the Canadian total. The University of Montreal is second, and the universities of Alberta, York, and British Columbia are third, fourth, and fifth, respectively. Of the 43 American universities, Columbia is first with 13 dissertations. Great Britain has produced a total of only five studies from four universities, the University of London accounting for two.

Dans les nombreuses sous-classifications de la sociologie, la recherche s'est intensifiée au fur et à mesure que la société canadienne prenait de l'importance. On trouve très peu de recherche en vue d'un doctorat entre 1920 et 1970. On a compté une thèse dans les années 1930, deux dans les années 1940, quatre dans les années 1950, 22 dans les années 1960, et enfin dix fois ce nombre dans les années 1970; les années 1980 semblent devoir surpasser ce total.

Parmi les 20 établissements canadiens qui produisent des thèses en ce domaine, l'Université de Toronto a fourni à elle seule 40% du total canadien. L'Université de Montréal arrive en seconde position, suivie des universités de l'Alberta, York et de la Colombie-Britannique, respectivement au troisième, quatrième et cinquième rang. Parmi les 43 universités américaines, Columbia vient en premier avec 13 thèses. La Grande-Bretagne apporte en tout cinq thèses, provenant de quatre universités; l'Université de Londres, pour sa part, en a fourni deux.

POPULATION: GEOGRAPHY AND DEMOGRAPHY / POPULATION: GÉOGRAPHIE ET DÉMOGRAPHIE

This is a classification of limited studies in all three countries, with a total of 21 dissertations. Fourteen were completed at six Canadian universities, with Alberta in the lead (4), followed by McGill and Montreal (3), Laval (2) and Carleton and Western Ontario (1). American universities produced five dissertations, three of which were completed in the

1970's. Great Britain, produced two, from the University of Aberdeen in 1980 and Manchester University in 1938.

Dans cette section, le nombre de thèses est limitée à 21 ouvrages dans les trois pays. Quatorze thèses proviennent de six universités canadiennes; l'Alberta vient en tête (4), suivie par McGill (3), Montréal (3), Laval (2), enfin Carleton (1) et Western Ontario (1). Les universités américaines en comptent cinq, dont trois ont été rédigées dans les années 1970. La Grande-Bretagne en a produit deux, respectivement aux universités d'Aberdeen (1980) et de Manchester (1938).

SPORTS, PHYSICAL EDUCATION AND RECREATION/ SPORTS, ÉDUCATION PHYSIQUE ET LOISIRS

Since physical education and recreation are usually associated with sports, the three areas have been combined for purposes of this study.

The greatest increase in all three areas is found during the 1970's and 1980's. Of the 16 Canadian universities involved in research in this classification, Alberta's 51 titles are more than the combined total of the other 15 universities. The universities of Toronto, Waterloo, Montreal, and British Columbia follow in that order. Among the American universities, Ohio State is the leader in sports, with Oregon the leader in physical education and recreation.

Du fait que l'éducation physique et les loisirs sont habituellement associés aux sports, les trois disciplines sont réunies en une seule section.

Dans les trois disciplines, le point culminant de l'augmentation de la production se situe dans les années 1970 et 1980. Des 16 universités canadiennes où des recherches ont été faites en ce domaine, celle de l'Alberta (51 thèses) dépasse l'ensemble du total des thèses des 15 autres universités. Les universités de Toronto, de Waterloo, de Montréal et de la Colombie-Britannique suivent. Quant aux universités américaines, celle d'Ohio State occupe le premier rang pour les sports; l'Université d'Oregon domine en éducation physique et en loisirs.

URBAN AND REGIONAL PLANNING/ PLANIFICATION URBAINE ET RÉGIONALE

Doctoral research on urban and regional planning is comparatively new. The first study appeared at McGill University in 1953, the second at Harvard University in 1957, and the third at Cornell University in 1958. During the 1960's, two studies appeared, one at the University of Ottawa in 1962, and one at the University of Toronto in 1968. Eleven studies were completed in the United States in the following 15 years, while 41 were completed in Canada during that same period. The University of Waterloo, accounts for half that number (21) while the University of British Columbia is second with eight. Two studies were completed in Great Britain at the University of London in 1976 and 1977. On the basis of the Canadian total for the first four years of the 1980's, the output of this decade will exceed the last. Of the ten American universities contributing dissertations in this area, Cornell produced three, the University of California (Berkeley) produced two and the remaining eight produced one each.

La recherche en vue d'une thèse de doctorat sur la planification urbaine et régionale est une nouveauté; c'est à l'Université McGill, en 1953, qu'une thèse en ce

domaine a été présentée pour la première fois. Ensuite, Harvard, en 1957, a suivi, puis Cornell, en 1958. Dans les années 1960, deux thèses ont paru, une à Ottawa en 1962 et une à Toronto en 1968. Au cours des 15 années suivantes, onze études ont été faites aux États-Unis et 41 au Canada au cours de la même période, dont la moitié (21) à l'Université de Waterloo; celle de Colombie-Britannique vient en second lieu avec 8 thèses. Deux thèses ont paru en Grande-Bretagne, à l'Université de Londres, l'une en 1976, l'autre en 1977. De 1980 à 1984, si l'on se base sur le nombre total des thèses canadiennes, les années 1980 seront plus productives que les années 1970. Des dix universités américaines auxquelles on doit des thèses en ce domaine, seulement Cornell (3) et California (Berkeley) (2), ont fourni plus d'une étude.

SCIENTIFIC STUDIES/ ÉTUDES SCIENTIFIQUES

The number of dissertations concerned with scientific studies that have been classified under this general heading, constitutes the third largest section. Almost all the 27 major Canadian universities have produced at least one scientific study dealing with Canada. The University of British Columbia has the largest number due to its work in botany and forestry. The University of Toronto is second, and McGill University is close behind. McGill's major specialization in scientific studies is entomology. The sub-classifications are listed below.

Le nombre total des thèses portant sur des études scientifiques classées sous ce titre constitue la troisième plus vaste section. Presque toutes les 27 plus importantes universités canadiennes ont produit au moins une étude scientifique se rapportant au Canada. L'Université de la Colombie-Britannique, en raison de ses travaux en botanique et foresterie, se classe au premier rang, Toronto vient en second, McGill suit de très près. La principale spécialisation de McGill en ce domaine est l'entomologie. Voici la liste des sous-classifications.

ANIMALS, WILDLIFE/ANIMAUX, VIE SAUVAGE

This section deals with animals peculiar to Canada. Seventeen Canadian universities approved 127 dissertations. The University of British Columbia (29), Alberta (21), Guelph (13), Toronto (12), and McGill (10) are the ranking five. Ninety-five of these titles were produced during the 1970's and 1980's.

Twenty-seven American universities produced 50 dissertations. The majority were approved during the last 15 years. Wisconsin is the leader.

Les études de cette section ont été groupées sur les animaux spécifiques du Canada; on y trouve 127 thèses approuvées par 17 universités canadiennes. Parmi ces dernières, les cinq plus productives ont été l'Université de la Colombie-Britannique (29), celle de l'Alberta (21), de Guelph (13), de Toronto (12) et enfin McGill (10). Quatre-vingt-quinze thèses ont paru dans les années 1970 et 1980.

Vingt-sept universités américaines ont fourni 50 thèses. Le plus grand nombre a été approuvé de 1970 à 1985. L'Université du Wisconsin est en tête de production.

BIRDS/OISEAUX

A comparative study of output shows the United States and Canada statistically even with many of the American studies being done on the Canada goose. Seventeen Canadian universities approved studies in this field, most within the last 15 years. The universities of Toronto and British Columbia ranked first and second in output, with five other universities producing only one study. Twenty-eight American universities were involved in this area. Cornell University and the University of Wisconsin ranked first and second, with 14 universities producing only one dissertation each.

Une étude comparative de la production montre que les États-Unis et le Canada sont statistiquement à égalité en raison du grand nombre d'études américaines sur l'oie canadienne. Dix-sept universités canadiennes ont approuvé des études sur les oiseaux, la plupart de 1970 à 1985; les universités de Toronto et de la Colombie-Britannique viennent en premier et cinq universités ont produit une seule étude. Vingt-huit universités américaines ont fait des recherches dans ce domaine; aux premiers rangs se trouvent les universités Cornell et du Wisconsin, quatorze ont produit une seule thèse.

FISH FROM CANADIAN WATERS/
POISSONS DES EAUX CANADIENNES

While almost the same number of Canadian and American universities were involved in research on fish in Canada, the former produced approximately 100 more studies than the latter. It is only during the 1970's and 1980's that there was a substantial increase in the number of dissertations produced by Canadian universities. The schools of Toronto, British Columbia, McGill, and Alberta are the leaders in that order. In the United States, the universities of Michigan, Ohio State, and Washington (Seattle) are equal leaders. One dissertation was approved in Great Britain at the University of Liverpool in 1980.

Alors que le même nombre d'universités canadiennes et américaines poursuivent des recherches sur les poissons au Canada, les premières ont produit environ une centaine de thèses de plus que les autres. De plus, ce n'est qu'au Canada que s'est produit une augmentation appréciable de thèses dans les années 1970 et 1980. Les universités de Toronto, de la Colombie-Britannique, McGill et de l'Alberta sont en tête de liste. Aux États-Unis, les universités du Michigan, d'Ohio State et de Washington (Seattle) sont également parmi les plus productives.

Une thèse a été aprouvée en Grande-Bretagne à l'Université de Liverpool, en 1980.

CRUSTACEANS AND MOLLUSKS/ CRUSTACÉS ET MOLLUSQUES

This classification reflects the fact that very little research was carried out in the United States or Canada until the 1970's, when the Canadian output increased significantly. Fifteen Canadian universities produced more than 60 studies; British Columbia and Toronto are the leading contributors with 12 titles each. the universities of McGill (8), Dalhousie (7), Alberta (5), and Laval (5) are the other important contributors. Eight American universities have produced a total of 12 dissertations. Ohio State and George Washington University are the leaders with three titles each.

Cette classification reflète le fait que très peu de recherches ont été faites aux États-Unis ou au Canada jusqu'en 1970, date où la production canadienne s'est accrue de façon importante. Quinze universités canadiennes ont produit plus de 60 études; avec 12 titres chacune, les universités de la Colombie-Britannique et de Toronto ont été en tête de la production. Viennent ensuite les universités McGill (8), Dalhousie (7), de l'Alberta (5) et Laval (5) dont la contribution est également importante. Huit universités américaines ont produit un total de 12 thèses. Ohio State et George Washington mènent le jeu avec trois thèses chacune.

ENTOMOLOGY/ENTOMOLOGIE

This is one of the larger sections of the scientific studies. Nineteen Canadian universities produced more than 160 dissertations, McGill is the specialist in the area, with over 40 titles to its credit. The universities of Alberta, British Columbia, Toronto, Manitoba, and Simon Fraser follow in that order. Three quarters of the studies were approved during the 1970's and 1980's. Of the 25 American universities with theses in this area, 14 produced one title each. The University of Cornell produced 14 titles and the schools of Harvard and Minnesota produced four each.

C'est l'une des plus vastes sections de la classification des études scientifiques. Dix-neuf universités canadiennes ont produit plus de 160 thèses; McGill, l'université spécialisée en ce domaine, a 40 thèses à son crédit. Les universités de l'Alberta, de la Colombie-Britannique, de Toronto, du Manitoba et Simon Fraser, suivent dans l'ordre. Les trois quarts des thèses ont été approuvées dans les années 1970 et 1980. Sur 25 universités américaines qui ont également produit des thèses en cette discipline, 14 n'en comptent qu'une seule chacune; Cornell a produit 14 titres, et Harvard et Minnesota quatre chacune.

WORMS/VERS

This is an extremely small section with a total of 27 titles. Twenty-five studies came from ten Canadian universities. McGill University is the leading contributor with seven titles, followed by Guelph and Toronto with four each. The ten remaining titles are divided among seven universities. Only one thesis was accepted by an American university, Ohio State in 1947, and one by a British University, Cambridge in 1976.

C'est une section très modeste avec un total de 27 thèses. Vingt-cinq études viennent de 10 universités canadiennes; l'Université McGill est en tête de production avec sept titres, suivie par celles de Guelph et de Toronto avec chacune quatre titres. Sept autres universités se partagent les dix autres thèses. L'Université d'Ohio State est la seule université américaine à avoir accepté une thèse à ce sujet, en 1947. L'Université de Cambridge, en Grande-Bretagne, a accepté une thèse en 1976.

BOTANY/BOTANIQUE

Botany is another sizeable section with over 200 titles from Canadian universities, and almost 100 from American universities. The Canadian list follows the pattern of large growth during the 1970's. The American list, also grew during the 1970's. Harvard University has the distinction of producing the first dissertation on Canadian botany in 1917. Of the 22 Canadian universities contributing to this field, British Columbia is first with over 50 titles. Toronto is second with half that number and the universities of Saskatchewan, Alberta, Manitoba, and Western Ontario follow in descending order. Examination of the output from American universities does not reveal an outstanding contributor. The schools of Harvard, Michigan, Ohio State, and Wisconsin are equal leaders.

La botanique est une autre section importante avec plus de 200 thèses produites dans les universités canadiennes et presque 100 dans les universités américaines. La production canadienne a suivi la courbe ascensionnelle des années 1970. La courbe américaine s'est également améliorée dans les années 1970. L'Université Harvard s'est distinguée en produisant la première thèse en botanique canadienne en 1917. Des 22 universités canadiennes qui ont travaillé en ce domaine, la Colombie-Britannique arrive première avec plus de 50 thèses. Toronto est seconde avec la moitié de ce nombre puis, les universités de la Saskatchewan, de l'Alberta, du Manitoba et Western Ontario suivent dans l'ordre. Quant aux universités américaines, aucune ne se distingue particulièrement; Harvard, Michigan, Ohio State et Wisconsin, toutes sur le même plan, se classent en tête des autres universités.

FORESTRY AND FORESTS/ SYLVICULTURE ET FORÊTS

There is a vast difference in output from Canadian and American universities. Canada produced over 100 titles, and the United States approximately 40. Over two thirds of the Canadian theses were produced during the last 15 years. The University of British Columbia is the outstanding leader with over 60 titles to its credit. The University of Toronto is second and Laval University ranks third. Of the 18 American universities, Yale stands out with five titles, followed by Minnesota and Syracuse with an equal number. The bulk of the American output was produced during the 1960's and 1970's.

Dans ce domaine, il existe une grande différence entre la production des universités canadiennes et celle des universités américaines. Le Canada a produit plus de 100 titres et les États-Unis environ 40. Plus des deux tiers des thèses canadiennes ont été rédigées entre 1970 et 1985. La Colombie-Britannique est de loin l'université qui a le plus de thèses en ce domaine à son actif avec 60 titres; Toronto vient avec seulement un quart de la production de la Colombie-Britannique, et Laval, troisième. Des 18 universités américaines, Yale (5) tient la tête, suivie par les universités du Minnesota et de Syracuse, avec un nombre égal de thèses. La plus grande partie de la production américaine date des années 1960 et 1970.

LIMNOLOGY AND FLORA AND FAUNA OF CANADIAN BODIES OF WATER/LIMNOLOGIE, FLORE ET FAUNE DES EAUX CANADIENNES

The major output for this area emerged during the last 15 years. Of the fewer than 100 titles approved in Canadian universities, more than three quarters of the work was produced during this period. The universities of Toronto, Waterloo, British Columbia, Dalhousie, and McGill were the leading producers. Fourteen American universities produced a total of 24 studies, with Ohio State accounting for one-third of the total. Eleven universities produced only one title each. Seventeen of the 24 titles were produced during the 1970's.

La plus grande partie des études en ce domaine a été faite entre 1970 et 1985. Parmi la centaine de thèses approuvées dans les universités canadiennes, plus des trois quarts datent de cette période. Les universités les plus productives sont Toronto, Waterloo, la Colombie-Britannique, Dalhousie et McGill. Aux États-Unis, l'Université Ohio State a produit un tiers des 24 thèses approuvées par 14 universités. Onze d'entre elles n'ont qu'un seul titre à leur actif et 17 des 24 thèses datent des années 1970.

HYDROGRAPHY, HYDROLOGY AND OCEANOGRAPHY/HYDROGRAPHIE, HYDROLOGIE ET OCÉANOGRAPHIE

It is not surprising to learn that of the 12 Canadian universities working in these areas, British Columbia and Dalhousie produced more than half of the studies, with McGill a distant third. The entire Canadian output was completed during the 1970's and 1980's. Of the 17 American universities listed here, Washington (Seattle) was number one with ten titles, and Oregon State, second with five. Ten universities produced only one study each. Two theses were approved in Great Britain, both at the University of Liverpool.

* For the sake of convenience, these three subclassifications are combined.

Il n'est pas surprenant d'apprendre que des 12 universités canadiennes qui ont produit des thèses en ce domaine, la Colombie-Britannique et Dalhousie ont fourni plus de la moitié des études, McGill venant au troisième rang, loin derrière. Presque toutes les thèses canadiennes ont été faites au cours des années 1970 et 1980. Dix-sept universités américaines ont produit des thèses; Washington (Seattle) se classe première avec dix titres et Oregon State, seconde, avec cinq; dix autres universités n'ont produit qu'une étude chacune. Deux thèses ont été approuvées en Grande-Bretagne, toutes deux à l'Université de Liverpool.

Pour des raisons de commodité, ces trois sous-classifications ont été regroupées.

PHYSICS/PHYSIQUE

Included under this heading are general topics such as astrophysics, astronautics, astronomy, atmospheric science, and geodesy. Thirty of the 45 dissertations were approved in the last 15 years. McGill University is the leader, followed by the University of British Columbia and Toronto. The American output is extremely small, with a total of six titles, five of which were produced during the 1970's by five universities, the University of Colorado presenting two. One dissertation was produced in Great Britain at the University of Edinburgh.

Il y a sous ce titre, des études sur des sujets généraux, sur l'astrophysique, l'astronautique, l'astronomie, la science atmosphérique et la géodésie. Trente des 45 thèses ont été approuvées entre 1970 et 1985. L'Université McGill vient en tête, suivie par celle de la Colombie-Britannique et de Toronto. La production américaine est extrêmement réduite avec un total de six titres, dont cinq produits dans les années 1970 par cinq universités; l'Université du Colorado en a présenté deux. La Grande-Bretagne a présenté une thèse soumise à l'Université d'Édimbourg.

HOW TO USE THE INDEX OF NAMES

The theses included in this bibliography are listed in alphabetic order according to **authors' names.** Each name is followed by the **entry number** under which the thesis is found. Theses that have been put into microform by the National Library of Canada are identified by the **microform number,** which appears within parentheses after the entry number.

COMMENT UTILISER L'INDEX DES NOMS?

Dans cette bibliographie, les **noms des auteurs** des thèses sont répertoriés par ordre alphabétique. Chaque nom est suivi d'un **numéro** sous lequel la thèse peut être trouvée. Les thèses microfilmées par la Bibliothèque nationale du Canada sont identifiées par un **numéro de microforme** qui se trouve, entre parenthèses, après le nom et le numéro.
